PROFESSIONAL SUMMARY

Data Science undergraduate with hands-on experience in Python, data analysis, machine learning, and predictive modeling. Skilled in data collection, preprocessing, exploratory data analysis (EDA), feature engineering, and regression-based ML systems using real-world datasets.

Practical exposure to API-based data collection, web scraping workflows, forecasting systems, and structured data processing using Pandas, NumPy, and Scikit-learn. Experienced in building end-to-end notebook-based projects and maintaining project repositories using GitHub.

Currently seeking opportunities in Data Science, Data Analytics, Data Research, AI Automation, and Python-based development roles.

TECHNICAL SKILLS

Programming & Libraries : Python, Pandas, NumPy, Matplotlib, Scikit-learn, Requests

Data Science & Analytics : Data Cleaning , Exploratory Data Analysis (EDA), Feature Engineering, Missing Value Handling, Encoding Techniques, Outlier Detection & Treatment, Regression Modeling, Forecasting, Model Evaluation (RMSE, R²)

Data Collection & Automation: API Data Collection, Web Scraping Basics, Structured & Unstructured Data Handling

Tools & Platforms: Jupyter Notebook, Google Colab, Git & GitHub, SQL, Advanced Excel

PROJECT EXPERIENCE

HTTP 500 Error Forecasting System

- Built a forecasting pipeline to predict HTTP 500 server errors using historical log datasets

- Performed preprocessing, feature extraction, and time-based trend analysis

- Developed predictive workflow for proactive monitoring and failure detection

House Price Prediction Model

- Developed regression-based ML models for predicting housing prices using multiple property features

- Applied feature engineering, preprocessing, and performance evaluation using RMSE and R² metrics

- Compared algorithms to improve prediction accuracy and model performance

Real Estate Price Prediction

- Built predictive models using structured real estate datasets

- Conducted EDA, feature selection, and data preprocessing

- Generated insights from pricing trends and property-related variables

Diamond Price Prediction

- Designed regression model for diamond price estimation based on multiple attributes

- Applied data cleaning, encoding, and visualization techniques

- Evaluated model performance using standard ML metrics

Concrete Strength Prediction

- Developed ML model to predict compressive strength of concrete materials

Analyzed feature relationships affecting engineering performance

Applied regression algorithms on engineering datasets

AC/DC Current Generation Prediction

Built predictive model for electrical current generation patterns

Performed preprocessing, trend analysis, and dataset transformation

Worked with numerical datasets for prediction tasks

Data Analysis & Preprocessing Notebook Repository

Created multiple notebooks covering: API Data Collection, File Handling, Web Scraping Basics, EDA (Univariate, Bivariate, Multivariate), Feature Engineering, Encoding Techniques, Missing Value Imputation, Outlier Treatment Methods

Maintained organized project repository using GitHub version control

EDUCATION

Bachelor of Engineering (B.E.) in Data Science (2023 – 2027)

St. John College of Engineering and Management, Palghar, Maharashtra

HSC (2021 – 2023)

Pirojsha Godrej Junior College (PGJC), Bordi, Palghar district, Maharashtra

SSC (2021)

M.B.B.I. Vevji, Talasari, Palghar, Maharashtra

CERTIFICATIONS

- Advanced Excel & Power BI – St. John College
- Python & Machine Learning Workshop – Testriq QA Lab
- Prompt Engineering Workshop – Testriq QA Lab

ADDITIONAL INFORMATION

- Strong interest in AI-powered automation and data-driven applications
- Familiar with collaborative project workflows and GitHub repository management
- Actively learning advanced data scraping, automation, and machine learning deployment workflows
